Chafee National Youth in Transition Database (NYTD)

NYTD Reporting Timelines and Populations

The reporting populations are represented with four icons.

S The **served population** includes all youth who receive an independent living service paid for or provided by the State agency during a six-month reporting period, regardless of age, foster care status, or placement type.

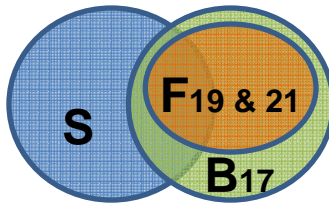

B17 The **baseline population** consists of youth 17 years old in foster care as defined in 45 CFR 1355.20.

F19 **F21** The **follow-up populations** are represented in two age groups: 19 and 21 year olds who participated in data collection as part of the baseline population.

NYTD Reporting Timelines and Populations

The Venn diagram shows how the reporting populations relate to each other.

In slides 4-11, the Venn diagram will change to reflect the particular data collection populations that correspond with the federal fiscal year (FFY).
